

# Recycling

People that throw trash in the ground are making a lot of landfills. If you throw trash on the ground you are not helping people and animals. If you think landfills are bad you are right. When you recycle you are helping make less landfills and helping people to have a better home.

If you recycle you are making new things out of old things. Some people think recycling is just trash. You are right. Because recycling is trash you have to recycle.

Why do people don't recycle? I wish all of the world agree with us. If you recycle people will agree with you. Because you are helping have a better home that is nice and clean. People that recycle are making the air cleaner. When you recycle you are helping people and animals have a better habitat.

Recycling is something fun to do
