

Did you know siberian tigers have been hunted so much there are only a few hundred left in the wild? I have done some research and learned that tigers are endangered mammals. Tigers need peoples help to stop hunters from shooting them. The facts will persuade you that we should save tigers?

Hunters should stop killing magnificent tigers. It is outrageous that steel traps & poison are used by hunters to help them kill tigers. Some hunters are killing tigers for their bones & fur for traditional chinese medicine. Hunters are also killing animals for their skin & offcails found a seizure of tiger's leopard skins in Calcuttd, India.

Some people are working to protect tigers. Scientists shoot darts at tigers so they put a device on them so they could study & learn more about them. People like Li Qua & Liao Xiansheng go on expeditions to the hupings nature reserve. Even more people should protect tigers because there are about 4,000 left in the wild.

We can help tigers. People can adopt a siberian tiger for \$26,95 from the Home Wildlife Institute. We can get a free action kit from World Wildlife fund. by doing these things tigers will be abundant.

You can see that tigers are endangered because hunters keep hunting them. Can you imagine if there were no tigers? We should tell people to not hunt tigers.
